

THE D3 GROUP for Developmental Dental Defects proudly announces its inaugural

International Symposium on MOLAR HYPOMINERALISATION & CHALKY TEETH

Hosted by the University
of Toronto & SickKids

MAY 2021
6TH – 9TH
TORONTO, CANADA

1-in-5

schoolchildren
HAVE **CHALKY TEETH**

14 million

new cases
EACH YEAR

10-fold higher

risk of decay
FOR **CHALKY TEETH KIDS**

SCOPE

A cross-sector call to action. This exciting addition to the **Chalky Teeth Campaign** will use a translational approach to formulate key questions aimed at improving management of, and ultimately preventing, **Molar Hypomineralisation** and other types of chalky teeth (D3s).

PLANS

DAY 1: address the status quo worldwide; **DAY 2:** identify key commonalities and questions; **DAY 3:** make plans for getting great answers. **ASPECTS COVERED:** population health, clinical management, research, education, translation to social good. **FORMAT:** presentations, panels, audience input, networking. **BUDGET:** no frills, help make D3G a self-sustainable social enterprise.

PLEASE HELP

We invite interested parties from academia, health professions, government and industry to help flesh out these plans. Our goal is to develop a collaborative event that is not only memorable but also transformative for social good. Contact the meeting secretary at: toronto2020@thed3group.org
