

## WELCOME TO THE WORLD-FIRST WORKSHOP ON D3s

In October 2020 we proudly presented **D3G's Pre-Symposium Online Workshop** as a COVID-safe forerunner to the inaugural **International Symposium on Molar Hypomineralisation and Chalky Teeth** which unfortunately had to be postponed until 2021 because of the pandemic.

In preparation for the D3 Symposium, the **Workshop interactive webinar** outlined D3G's translational accomplishments and used this perspective to **formulate key questions** and **identify global projects** aimed at **improving management** of, and ultimately **preventing**, [Molar Hypomineralisation](#) and other types of [chalky teeth](#). Aspects covered included **population health**, **clinical management**, **research**, **education**, and **science translation** through to improved **policy** and **products**.

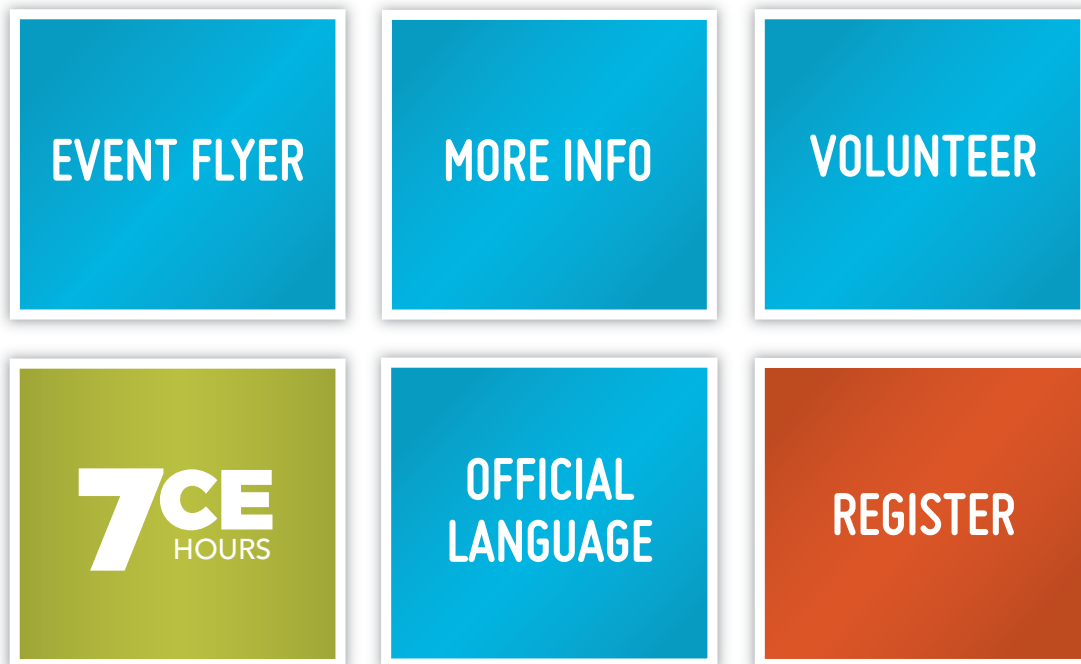

This breakthrough event, which happened in the [100th year of chalky enamel research](#), centred on a draft **D3 Discussion Framework** document intended to become a translational **framework** for the Symposium plus ensuing action plans and publications leading to social good (see [event flyer](#)).

An unprecedented **cross-sector gathering** of **35 panellists** from **16 countries** – comprising **science translators**, **career scientists**, **paediatric dentists**, **orthodontists**, **general dentists**, **public health dentists**, **hygienists & therapists**, **paediatricians**,

100   
1920 - 2020  
**CHALKY TEETH  
CENTENARY**

**industry directors, educationists** and an **international research funding manager** –provided their perspectives on the 3 levels of **“the Molar Hypomin problem”** (i.e. *clinical/population impacts, educational/training needs, research gaps*). Additionally, **leading D3ers** provided contextual background and shared the **latest about D3G’s** [research breakthrough](#), [clinical](#), [educational](#), and [translational](#) initiatives.

A comprehensive **Continuing Education (CE) pack** is now available, offering up to [7 CE hours](#) of study – this comprises three 2-hour videos with a time-indexed program sheet, enriched discussion (Q&A) records, the future-shaping **D3 Discussion Framework** document, and CE quizzes for each hour – to catch up on this ground-breaking event, use the REGISTER button below.

The D3 Group for Developmental Dental Defects

**INTERNATIONAL SYMPOSIUM ON MOLAR HYPOMINERALISATION & CHALKY TEETH**  
Hosted by the University of Toronto & SickKids

**Pre-Symposium Online Workshop:**  
**22ND - 24TH OCTOBER, 2020**  
5 - 7pm (US EST)

**HOT MENU**

- Hear the latest about D3G's research breakthrough, clinical educational & translational initiatives
- Help shape the future by contributing to the Symposium Discussion Framework document

**COOL AGENDA**

- Key questions for the field - cross-sector, translational
- Global projects - collaborative, translational
- Plan of attack - medical prevention, intersectoral management

**CROSS-SECTOR PARTICIPATION**

**WANT IT?** Academics, Practitioners, Industry, Government, Community

**WANT IT?** Research, Clinical, Education, Policy products
