

THE D3 GROUP for *Developmental Dental Defects* proudly invites you to its inaugural

International Symposium on **MOLAR HYPOMINERALISATION & CHALKY TEETH**

Hosted by the
University of Toronto & SickKids

**OCT 2020
22ND - 24TH
TORONTO, CANADA**

WHAT'S HAPPENING?

A "cross-sector conversation" aimed at prevention of "chalky teeth" and allied tooth decay.

A ROLE FOR ME?

Yes, if you have an opinion and want to voice it! The event will centre on open discussion and networking, aiming to achieve consensus across an internationally holistic viewpoint. With ANZers being more D3-savvy than most, it's hoped there'll be strong representation from "D3G Down Under".

MORE INFORMATION?
